

**REMARKS**

Applicants hereby offer preliminary amendments to the present application to place the application in better form for allowance.

Applicants have canceled Claims 1-10 in favor of replacement Claims 11-20 to correct certain informalities (including avoidance of use claims) and to clarify the intended meaning of the claims without materially altering their scope. Applicants respectfully submit that the claims are fully supported in the specification.

Applicants have amended the specification to capitalize all letters in the title and to insert a statement of priority. Applicants submit that these amendments serve only to clarify their application and do not alter the scope of their disclosure.

Applicants have amended the Abstract to change the title for the reasons discussed above and to change the heading and body to a more customary form. A copy of the new Abstract is separately attached.

In view of the preceding amendments and remarks, allowance of the claims is respectfully requested.

Respectfully submitted,

By

CONCENTRATED SUSPENSIONS  
ABSTRACT OF THE DISCLOSURE

This invention relates to novel suspension concentrates comprising

- a) at least one active compound, solid at room temperature, from the group of the azoles and/or the strobilurins,
- b) at least one penetration enhancer from the group of the alkanolethoxylates,
- c) at least one dispersant from the group of the polymers of methyl 2-methyl-2-propenoate and  $\alpha$ -(2-methyl-1-oxo-2-propenyl)- $\omega$ -methoxypoly(oxy-1,2-ethanediyl), the tristyrylphenoethoxylates and/or the propylene oxide/ethylene oxide block copolymers having molecular weights between 8000 and 10 000,
- d) water and
- e) additives, if appropriate,

to a process for preparing the novel suspension concentrates and to their use for applying the active compounds comprised therein to plants and/or their habitat.
